

PLATE LXV.

Drifted and Stranded Fruits collected by Mr Moseley.

Figure F. 1 and 2.—Different views of the fruit of *Grevillea gibbosa*.

„ 3.—Seed of the same : natural size.

„ G. 4.—Fruit of *Grevillea* sp. ?¹ natural size.

„ 5.—Vertical section of the same.

„ 6.—Seed.

„ H. 7 and 8.—Views of the acorns of a species of *Quercus* : natural size.

„ I.—Water-worn fruit of *Orania aruensis*, with germinating seed : natural size.

¹ Dr Beccari thinks this may be the fruit of a new genus of Proteaceæ, of which he collected foliage only. In the fruit sent to Dr Beccari there were two fully developed seeds.
