

PLATE XII.

Figs. 1-14. METACRINUS ANGULATUS, n. sp.

	×	Diam.	Page
Figs. 1, 2. Upper and lower views of the basal ring,	x	3	291
Figs. 3, 4. Proximal and distal faces of the fourth (axillary) radial,	x	3	9
Figs. 5, 6. Proximal and distal faces of the third radial,	x	3	48
Figs. 7, 8. Proximal and distal faces of the epizygal of the second radial,	x	3	48
Figs. 9, 10. Proximal and distal faces of the hypozygal of the second radial,	x	3	9
Fig. 11. Lower or dorsal aspect of a first radial,	x	3	293
Fig. 12. Distal articular face of a first radial,	x	3	9
Figs. 13, 14. An isolated basal, from below and above,	x	3	293

Figs. 15-25. PENTACRINUS ASTERIUS, Linn., sp.

Figs 15, 16. Upper and lower views of the calyx,	x	3	33
Fig. 17. Dorsal aspect of the two outer radials with the first distichals attached,	x	3	300
Figs. 18, 19. Proximal and distal faces of the third (axillary) radials,	x	3	305
Figs. 20, 21. Proximal and distal faces of the second radials,	x	3	305
Fig. 22. Lower or dorsal aspect of a first radial,	x	3	293
Fig. 23. Distal articular face of a first radial,	x	3	9
Figs. 24, 25. An isolated basal, from below and above,	x	3	293
